

1. Project Overview

Phoenix Water Club (PWC) is commissioning a custom, web-based platform to digitize and automate its multi-stage career counseling program. The platform operates on a **B2B model**, servicing educational institutions. Phase 1 focuses on delivering a Minimum Viable Product (MVP) within a targeted ~30-day timeline to facilitate pre-booked institutional orders.

Student Cohorts

The platform must serve three distinct cohorts. Each has its own pre-counselling form structure and its own psychometric assessment question bank (different question counts and trait emphasis), but all three share the same underlying workflow, trait framework, and reliability-scoring logic. Content must be cohort-specific; the engine underneath must be single and shared.

- Class 9 –10

Goals

The core objective of Phase 1 is to establish a seamless, manual-input-driven digital lifecycle for students, parents, and counselors, setting the foundation for advanced automations (Phase 2 & 3). Architecture - a modular monolith for Phase 1 to support white labelled subscription business models.

1a.Global instructions

Design Specifications

purple theme

Visual Design Guidelines (branding, color, typography)

Design System & Component Library

Menu Navigation

Accessibility & Responsive Requirements

Frontend Specifications:

Based on the requirements for scalability and rapid MVP deployment, the following technology stack is proposed for Phase 1:

- **Frontend Stack:** React 18, Vite, TypeScript, Zustand, and styled-components.
- **Backend Stack:** Node.js, Express, TypeScript, Prisma, and PostgreSQL.

2. User Roles & Access

The system will support three primary user access levels.

Role	Access & Capabilities
Admin (PWC Staff)	Manages student credentials, schedules, report distribution, overall platform monitoring, and career library data.
Counsellor	Views assigned student data, edits the live Counsellor Chart during sessions, and accesses the Career Library.
Student	Accesses forms, assessments, session booking, the Career Library, and the final Career Path Report.
Super Admin	Manages platform-wide settings, onboards new institution (tenant) accounts, and manages career library data.

Note: Parents do not have dedicated login credentials. They will interact with the platform via secure, time-limited, email-specific links.

1. Super Admin

User stories:

1. Super admin can manage career library (add/edit/delete)
2. Can see the stats overview of student, counsellor and project details in the dashboard(platform monitoring)
3. Super admin can create admin users by user types(institute, counsellors) (phase two)

! Pwc app admin login details created manually

1.1 Can manage the career library

Feature description: can manage the career library data

Form data capturing: cluster, industry, domain, job role, ai resilience grading, ai resilient comment, one line description, top companies recruiting, salary range approx, salary range global, minimum qualification(10/12) entrance exams,certifications, top courses to study.

By default 1,300+ careers across clusters/domains, extensible when a counsellor encounters an unlisted role will be dumped.

Notes on Career Library Logic

1. **List view** supports search + multi-filter (Cluster, Industry, Domain, AI Grade) so students can quickly locate or audit existing entries.
2. **Add/Edit split across 2 steps**: Step 1 captures classification + high-level summary (cluster, industry, domain, job role, AI resilience grade/comment, one-liner); Step 2 captures the deeper reference data (companies, salary ranges, qualifications, exams, certifications, courses).
3. **Tag-style multi-entry fields** (Top Companies, Entrance Exams, Certifications, Top Courses) use an "add chip" pattern since these are typically multiple values, not single text fields.
4. **AI Resilience Grading** is a fixed-option selector (Low/Medium/High/Very High) paired with a free-text comment field to justify the grading — keeps data consistent for filtering while allowing nuance.
5. **Dual salary fields** (India approx vs. Global) are kept as separate min–max range inputs with distinct currency symbols to avoid ambiguity.
6. **Since the user role is "student,"** consider whether entries should go through a review/approval step before publishing to the shared library, or whether edits are tracked with an "edited by" / "last updated" audit trail — worth clarifying with stakeholders as this affects data integrity for other students relying on the library.
7. **Empty/edge states** to design separately: no career entries yet, duplicate job role warning on save, mandatory field validation errors.

1.2. Super admin can view the stats overview of student, counsellor, and institution

from your school admin

4.2: Mandatory Password Change + Student Profile Completion

User: Student

Feature description: On first successful login, the student is required to change their auto-generated password before accessing any other part of the app. Immediately after, the student is prompted to complete their profile by filling in additional personal details not captured during the admin's bulk upload.

Capturing data:

- New Password, Confirm Password
- (Pre-filled, read-only, from admin upload: Name, Class, Division, Mobile, Email, Parent Name, Parent Mobile, Parent Email)
- Whatsapp number if different

Notes:

- Password policy (min. length, complexity) should be enforced and shown inline.
- Profile form should be a hard gate — student cannot skip or access other features until submitted.

	[Update Password →]		
	Update Password		

4-3: Pre-Counselling Form Submission

User: Student

Feature description: As the next mandatory step after profile completion, the student must fill and submit a pre-counselling form. This captures the baseline context the counsellor will use to prepare for the very first session. ~80% MCQ / 20% open-ended, cohort-specific

Capturing data:

- Favorite / strongest subjects
- Least favorite / weakest subjects
- Career interests so far (if any, free text or multi-select)

- Extracurricular activities / achievements
- Any specific concerns or questions for the counsellor
- Parent's occupation(s) (context for family background)
- Any learning difficulties or special considerations (optional, sensitive field)

Notes:

- This form should be a hard gate before assessment forms unlock (per Story 4).
 - Consider marking sensitive fields (learning difficulties) as optional and privacy-protected.
-

4.4: Assessment Form Submission (Student + Parent)

User: Student and Parent

Feature description: Once the pre-counselling form is submitted, both the student and their parent are required to complete their respective assessment forms before the student can proceed to scheduling sessions. This may include the student's aptitude/interest assessments and a separate parent questionnaire. MCQ-based, cohort-specific, weighted scoring engine

Capturing data:

- *Student side:* Aptitude Test responses, Interest Inventory responses
- *Parent side:* Parent questionnaire (expectations for the child, observed strengths/interests, any concerns, involvement level)

Notes:

- Parent access needs its own login/link (likely sent similarly to Story 1, scoped to their child) — worth confirming if parent has a separate account or a guest/token-based form link.
- Session scheduling (Story 5) should remain locked until both student and parent submissions are complete — the readiness-gate pattern used in the "Generate Report" feature could apply here too.

4.5: Schedule First Video Session

Feature description: After both assessment forms are submitted, the student can schedule their first video counselling session by selecting an available slot from the assigned counsellor's calendar. Session 1 and 2 booking at the same time.

Capturing data:

- Assigned Counsellor (auto-assigned by system according to the availability)
- Preferred Date
- Preferred Time Slot (from counsellor's published availability)

Notes:

- Email will be send to student, counselor and parent with the timing (link will be send later for parent). Links for session will be available to counsellor and student,10 min prior to the session.
- Cancellation/reschedule is available until the 24 hr gap for each session
- Minimum 2 days gap from session 1 and session 2 booking.

Schedule Your First Session

Step 4 of 4

Your Counsellor: Mr. Nair

Select a Date for session 1

◀ August 2026 ▶

Mon	Tue	Wed	Thu	Fri	Sat	Sun
		1	2			
3	4	● 5	6	7	8	9

4.6: Attend First Video Session

Feature description: At the scheduled time, the student joins the first counselling session using the join now link in the app, similar to the counsellor's join experience.

Notes:

- Consider a "Join Now" activation window (e.g., link becomes clickable 10 minutes before start) mirroring the counsellor-side session join pattern.

Student App > My Sessions		
My Counselling Sessions		
Session 1 — Career Counselling		
Today, 04 Aug 2026		
10:00 AM – 10:45 AM		
Online (Video Call)		
Starts in: 00:14:32		
[ Join Now] (enabled 10 min before)		
[Reschedule Request] [View Pre-Form Status]		

- Report should render in-app (not just as a download) so the student can review it before deciding to download/share.

PHOENIX WATER CLUB

Career IKIGAI Report

STUDENT NAME	Student Name
CLASS	Class 9&10
SCHOOL NAME	School Name

4.9: Student and Parent Feedback Submission

User: Student and Parent

Feature description: After viewing the final report, both the student and parent are prompted to submit feedback on their overall counselling experience. largely MCQ with some open-ended questions, from both student and parent

Notes:

- Consider whether feedback is mandatory before report download (Story 10) is unlocked, or optional/skippable.
- Feedback data likely feeds into the Admin dashboard or counsellor performance reporting.

PHOENIX WATER CLUB

Design Destiny · kREATE Career Counselling Programme

STUDENT FEEDBACK QUESTIONNAIRE

Post-Counselling · Class 9 & 10

Please share your feedback regarding your recent career guidance experience. Your responses help us enhance our programme for future students. Your honesty is genuinely valued — there are no right or wrong answers.

Student Name / Code: _____ Counsellor: _____ Date: _____

Sections 1 and 4 below use the Effectiveness Scale:

Score	Label	Meaning
1	Very poor, not helpful	The respondent felt the session or outcome failed to deliver any meaningful value.
2	Below expectations	Some value was delivered but fell short of what the respondent expected.
3	Acceptable but not impressive	Met a minimum threshold but did not stand out in any meaningful way.
4	Good & met expectations	Delivered what was expected; the respondent is satisfied.
5	Excellent & beyond expectations	Exceeded expectations; the respondent was delighted with the outcome.

Section 1: Session Experience [S-SE]

1. The counsellor explained my assessment results in a way I clearly understood.

- ☐ Very poor, not helpful
- ☐ Below expectations
- ☐ Acceptable but not impressive
- ☐ Good & met expectations
- ☐ Excellent & beyond expectations

4.10: Download Report

User: Student

Feature description: After viewing the report (and submitting feedback, if mandatory), the student can download the final report as a PDF for their own records or to share offline. Career IKIGAI Report — the final deliverable released to the student in pre-defined formats

Notes:

- Should reuse the same report file generated by the counsellor (per the "Generate Report" feature), not create a separate copy.
- Consider whether parent also gets independent download access, or only receives it via the counsellor's "Share with Parent" action from the earlier feature.

5. Parent

User Stories:-

1. Parent will be getting a link in the email for doing the Pre-Counseling Forms of Mission, and it will have an expiry date as well.
2. Parent will get the video session links to join the session with student.
3. Parent needs to fill the feedback form in order to make the student report card downloadable.

5.1: Parent Receives Expiring Link for Pre-Counselling Form

Feature description: The parent receives a link via email to fill out the Pre-Counselling Form related to their child's counselling process. This link is time-bound — it carries an expiry date, after which it can no longer be used to access the form, and the parent would need to request a fresh link.

Capturing data:

- Parent's observations about the child's strengths/interests
- Expectations from the counselling process
- Any concerns to flag for the counsellor
- Preferred level of involvement in the process

(Assumption: this is the parent's counterpart to the student's Pre-Counselling Form / Parent Questionnaire described earlier — flagging "Mission" in the original story as unclear; treating it as the standard Pre-Counselling Form flow. Please confirm if "Mission" refers to something specific, e.g., a named program or batch, that should appear in the form/email context.)

Notes:

- Expiry duration (e.g., 7 days, 14 days) needs to be confirmed with the team.
- An expired-link state must be handled gracefully, with a clear way to request a new link (likely via the student, admin, or a "Resend Link" self-service option).
- Since parents may not have a full account, the link itself is likely the sole authentication method — worth confirming if any additional verification (e.g., OTP to registered mobile) is needed for security, given this form may contain sensitive information.

PARENT PRE-COUNSELLING FORM

Career Counselling Programme — Class 9 & 10

Instructions for Parents

22 Questions	5 Sections	12–15 Minutes	100% Confidential
------------------------	----------------------	-------------------------	-----------------------------

Before You Fill This Form

- 1 Find a quiet moment — away from your child.**
Choose a time when you are relaxed and undisturbed — not between tasks or during a busy hour. These questions deserve your unhurried attention.
- 2 Fill this independently or along with your spouse.**
Your perspective is most valuable when it is uninfluenced. Please do not discuss your responses with your child at all, and do not try to align your answers with theirs.
- 3 Answer based on what you genuinely observe — not what you hope for.**
There is a natural temptation to present your child in the best light. Please resist it. Accurate observations — including doubts, concerns, or gaps — give the counsellor the clearest picture to work from. Your responses will only be seen by the career counsellor.

What This Form Is About

This is not a report card — and it is not about evaluating your child.

As a parent, you observe your child in contexts that no teacher or counsellor ever sees — at home, in unguarded moments. That perspective is irreplaceable, and this form is how you share it.

5.2: Parent can join the video session with the link in the email.

Feature description: Parent can join the video session 1 and 2 with the link they gets 10 min prior to the session.

| FROM: Phoenix Water Club <noreply@phoenixwaterclub.com> |

| TO: parent@email.com |

| SUBJECT: 🛎 Reminder: Aarav's Counselling Session starts in |

| 10 min — Join Link Inside |

| PREVIEW: Session with Jane Doe today at 10:00 AM. Tap to join..|

| |

| Hi Mr. Mehta, |

| |

| This is a reminder that Aarav's career counselling session |

| is coming up shortly. Here are the details: |

| |

|
|

| | 📅 Date Today, 04 Aug 2026 | |

| | 🕒 Time 10:00 AM – 10:45 AM (IST) | |

| | 👤 Student Aarav Mehta | |

| | 💻 Mode Online Video Session | |

|
|

| |

JOIN SESSION

(Button becomes active 10 minutes before start)

A FEW THINGS TO KEEP IN MIND

- Parents may join as an observer at the counsellor's discretion — please check with your counsellor if unsure.
- Ensure a stable internet connection before joining.
- Find a quiet space for Aarav during the session.

5.3: Parent Feedback Required to Unlock Report Card Download

User: Parent (gates access for Student)

Feature description: The student's final report card becomes downloadable only after the parent has submitted the feedback form. Until then, the report can be viewed but the download option remains locked.

Capturing data:

- Overall satisfaction rating
- Whether the report met expectations
- Comments/suggestions (*Same feedback fields as the earlier Parent Feedback story — this story adds the download-gating behavior on top.*)

Notes:

- This updates the earlier assumption (from the full student journey wireframes) that feedback was optional before download — per this story, **parent feedback specifically is now a hard gate** for the download action. Student's own feedback does not appear to gate anything per this story; worth confirming if student feedback should also be required.
- The student should see a clear, non-blocking message explaining *why* download is locked and whom it depends on (parent), plus a way to nudge/remind the parent.
- Viewing the report in-app remains unaffected — only the download action is gated.

PARENT FEEDBACK QUESTIONNAIRE
Post-Counselling · Class 9 & 10

Thank you for partnering with us in your child's career discovery journey. Please provide your candid feedback to help us refine our guidance services.

Parent Name: _____ Student Code: _____ Date: _____

Sections 1 and 2 below use the Effectiveness Scale:

Score	Label	Meaning
1	Very poor, not helpful	The respondent felt the session or outcome failed to deliver any meaningful value.
2	Below expectations	Some value was delivered but fell short of what the respondent expected.
3	Acceptable but not impressive	Met a minimum threshold but did not stand out in any meaningful way.
4	Good & met expectations	Delivered what was expected; the respondent is satisfied.
5	Excellent & beyond expectations	Exceeded expectations; the respondent was delighted with the outcome.

Section 1: Programme Effectiveness *[P-PE]*

1. The assessment results were explained to us clearly and in a way we could understand.

- ☐ Very poor, not helpful
- ☐ Below expectations
- ☐ Acceptable but not impressive
- ☐ Good & met expectations
- ☐ Excellent & beyond expectations

2. The career recommendations made were realistic and practical given my child's stream and strengths.

- ☐ Very poor, not helpful

Student Counselling Workflow

○ Student / parent self-service

○ Counsellor-led session

Status Lifecycle

Draft → Profile Completed → Pre-counselling Forms Submitted → Assessment Pending → Assessment Completed → Session Scheduled → Session 1 Completed → Counsellor Feedback Report → Session 2 Completed → Counsellor Feedback → Student & Parent Feedback → Closed

- Separate, simplified summary templates are generated for the Institution.

Data Retention

- All student, parent, assessment, and session data is purged automatically once a counselling cycle is marked “Closed” — no fixed retention window beyond that.

Decision: immediate purge on closure was chosen over a delayed retention window, since it's the simpler default and easiest to defend to institutions on data-privacy grounds. If PWC's NDAs with a given institution require records to be kept for a fixed period post-closure for dispute-resolution purposes, that institution can be flagged for a longer retention rule — build the purge job to take a configurable number of days per institution, so this can be adjusted later without a rebuild.

Functional Module Breakdown

Student Panel

- Login (credential-based, forced password reset on first use)
- Dashboard overview and workflow status tracker
- Profile management
- Pre-counselling form
- Assessment access (unlocks post pre-counselling completion)
- Session 1 and Session 2 scheduling against the combined counsellor calendar
- Career Library browse/search
- Feedback form
- Report download (gated behind both student and parent feedback submission)

Parent Access (link-based, no login)

- Secure, time-expiring, single-use pre-counselling form link sent to the primary email
- Secure feedback form link sent post Session 2
- No dashboard, no persistent account

Counsellor Panel

- Dashboard: assigned students, upcoming/blocked slots, pending reports
- Counsellor Chart: view and live-edit during sessions
- Session management: reschedule/cancel, video link access, transcript/notes (if enabled)

- Career Library: browse, search, and add-new-entry-for-admin-approval
- Report generation interface and student history access

Admin Panel

- Dashboard overview with student, counsellor, and institution statistics
- Bulk student upload (Excel), auto credential generation and export, duplicate detection
- Student database: view/add/edit/archive, workflow-stage tracking
- Counsellor management: profile, availability/slot management, auto/manual allocation, performance dashboard, workflow-stage tracking
- Career Library master: full CRUD (Create/Read/Update/Delete), approval queue for counsellor-submitted entries
- Session booking oversight: slot creation, conflict resolution, monitoring (upcoming/missed/rescheduled/cancelled)
- Feedback analytics: counsellor ratings, session ratings
- Reports & exports: PDF/Excel, institutional summaries
- Data retention/purge control rule (see above)

Assessment & Scoring Engine

- Cohort-specific question banks (Class 9–10 / 11–12 / Graduate), single shared scoring engine underneath
- Trait-level and module-level scoring, weighted normalisation
- Response-validity checks: timer tracking, tab-switch monitoring, anti-random-response detection, auto-save
- Stream and career-fit recommendation output feeding directly into the Counsellor Chart
